\* How to order SMS-1000SQ

- Choose the output model among USB, Digital and Analog output.
- Choose which OS you prefer to have between Linux & Windows.

Linux : Eunhasu

Windows : Windows 10 Pro + AO, Server 2012 R2 +AO

- Choose colors between silver and black.

- Choose options.

- Storage drive options :

The standard size is 64GB SSD. (The price for the storage device be changeable depends on the current market price.)

If you choose the bigger sized SSD, the standard 64GB SSD will be taken off, but if you choose the HDD, the standard 64GB SSD will remain for OS operation.

SOTM recommend using NAS with ISO-CAT6 and dCBL-CAT7 rather than increasing the internal storage drive size.

- \*sCLK-EX or sCLK clock options:

SOTM highly recommend adding sCLK or sCLK-EX clock to make much improved sound quality.

For Digital or Analog output model, sCLK clock can be installed to USB module or Digital and Analog module. So you can choose where to add the sCLK clock.

The sCLK-EX option is distinguished by

sCLK-EX for USB output,

sCLK-EX for Digital output(USB+Digital)

sCLK-EX for Analog output(USB+Analog),

-Bluray drive options :

Eunhasu : for ripping purpose only

Windows Edition : \*Auto ripping software will be supplied together and additional cost of the software will be charged. Also it plays music in Windows system.

-Choose 1 year Roon license purchase.

"ROONserver, Jriver, Qobuz,Tidal, Foobar2000 are pre-installed as an audio playback software for Windows OS products. We highly recommend using ROON as for audio playback software for SMS-1000SQ Windows Edition."

"Roon, Squeezeelite, MPD/DLNA, Shairport, HQplayer NAA is supportive for Eunhasu OS.
